DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 3, 2003 has been entered.

Claim Rejections - 35 U.S.C. § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Kotis.

The patent to Kotis shows a two stage fishing bobber having a main body 14 and a member 10, 11 resiliently displaceable with respect to the bobber main body in response to a force on the member noting that the spring 10 is fixed on the line 11 at 10a as disclosed in column 1, lines 57-60.

Claim Rejections - 35 U.S.C. § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kotis.

The patent to Kotis shows a two stage fishing bobber which forces down the member and then the main body. It is not clear if the force to displace the member to a down position is substantially equal to the buoyant force of the bobber main body, but it follows that when the member 10 of Kotis is in the down position that the bobber main body is submerged since as the spring 10 is displaced downwardly, the spring will start to compress and move the main body downwardly. At any rate, in reference to claims 19 and 20, it would have been obvious to employ a force to displace the member to a down position equal to the buoyant force of the bobber main body so that when the member is in the down position the bobber main body is submerged since this is merely a matter of design choice since not stated problem is solved.
